

# TurfSync Pro

Data driven sports and recreational turf surface performance analysis online portal

TurfSync Pro is a bespoke online portal that assists with managing sportsfields and recreational areas through its easy-to-use data collection platform. It provides real time information, analysis and reporting to support decision making around managing usage, allocating resources and planning capital works.

## TurfSync Pro

- Streamlines sportsfield condition assessments
- Highlights issues and allows trends to be easily seen
- Determines potential usage based on current condition and agronomic factors
- Identifies sportsfields that are being overused

## How TurfSync Pro can help you

- Helps identify the need for preventative maintenance
- Assists decision making around managing usage
- Provides supporting information with building a business case for capital improvements
- Improves communication between parks and leisure departments and with users
- Saves time and improves record keeping procedures

## TurfSync Pro

- Councils
- Universities and schools
- Maintenance contractors
